

Opti-Soil

DENSITY:

8.82 lbs per gallon at 68 degrees Fahrenheit

CONTAINS BENEFICIAL SUBSTANCES:

Carboxylic acid	14.5%
Nonionic surfactants	10%
Water	75.5%

Description:

Opti-Soil is an irrigation water treatment or soil treatment that is intended to help drop Bicarbonates in the soil to release tied up nutrients and allow salts to leach and water to penetrate more effectively into the soil.

Volume: 265 gallon/1003.25 liters per tote.

DIRECTIONS FOR USE:

Use in irrigation water or directly on soil.

APPLICATION RATES:

Ground Spray: Apply 4 to 15 gallons of Opti-Soil per acre depending on your soil.

Water Application: Apply through irrigation Opti-Soil at 2 quarts to 1 gallon per acre.

COMPATIBILITY:

When you are applying Opti-Soil through irrigation water it is compatible with most fertilizers, fungicides, and pesticides. In all cases it is recommended that a jar test be made to determine the compatibility of Opti-Soil with other materials before proceeding with high volume injections in irrigation systems
